the **PavePad**[®] system

CREATING A BEAUTIFUL OUTDOOR
LIVING SPACE IN AN URBAN ENVIRONMENT

THE PAVEPAD PAVING SUPPORT MAKES IT POSSIBLE FOR YOU TO CREATE AN ATTRACTIVE AND INTERESTING OUTDOOR LIVING SPACE.

PAVEPAD PAVING SUPPORTS MAKES IT EASY FOR YOU TO TURN AN UNUSED FLAT ROOF SURFACE INTO AN ATTRACTIVE AND USEFUL OUTDOOR SPACE. THE PAVEPAD WILL BE THE SUPPORT AND LEVELLING SYSTEM FOR YOUR TERRACE – WHICH CAN BE SLABS AS WELL AS TIMBER OR COMPOSITE DECKING.

BY USING THE PAVEPAD SYSTEM YOU CAN CREATE A TERRACE WHICH WILL BECOME AN ATTRACTIVE OUTDOOR AREA AROUND A GREEN ROOF (SEDUM) ENVIRONMENT.

YOU ARE FREE TO DESIGN AND SHAPE; PAVEPAD WILL SUPPORT YOUR IDEAS.

.....
A relaxing and peaceful environment
in the middle of a dynamic and
innovative building.

THE ROOF TERRACE is mainly
paved with concrete slabs, which are
supported and leveled on PavePad
paving supports. The area is
separated into small “islands” by
putting in beds and planters with
different grass species and flowers.
This gives the roof terrace a natural
and varied look, making an
interesting contrast with the modern
architecture of the building.

.....

PAVEPAD PAVING SUPPORT GIVES YOU THE FREEDOM TO INCORPORATE THE ROOF AS A COMMON LIVING AND LEISURE SPACE FOR THE INHABITANTS OF THE BUILDING.

BY COVERING VENTILATION DUCTS AND TECHNICAL INSTALLATIONS UNDER THE PAVED AREA, MANY OTHERWISE DESERTED ROOFS CAN BE TURNED INTO LIVING ENVIRONMENTS CREATING OUTDOOR SPACES WITH MAGNIFICENT VIEWS.

.....
THE ARCHITECT HAS created a diverse impression by combining three different surface materials. Concrete slabs, wood and pebbles divide the total area into smaller parts. The concrete slabs provide the walking area, and at the same time it hides the technical installations under the slabs. The design of this terrace made great demands for the support and leveling system as well as to the expertise of the supplier. Demands which were met fully by the PavePad paving support.
.....

.....
PAVEPAD can also be used for supporting timber decking. The architect has in this case created an open outdoor space, with a magnificent view of the city, and the surrounding country side.

The timber decking can be supported on timber or steel beams which are supported and leveled by PavePad paving supports.

In this case timber deck squares are fixed to the beams by using visible supports in stainless steel, which adds a touch of elegance in harmony with the beautiful surroundings.

.....

THE PAVEPAD PAVING SUPPORTS ARE NOT ONLY FOR SLABS.

THEY CAN JUST AS WELL BE USED FOR SUPPORTING AND LEVELLING OF ALL KINDS OF DECKINGS IN TIMBER AND COMPOSITE.
